4) newConnections.html

The screenshot displays the MusicTogether website interface. At the top, a black header bar contains a white 'M' logo on the left, the text 'Welcome to MusicTogether!' in the center, and the tagline 'Where you can learn from others and teach others too.' below it. On the right side of the header, there are three links: 'Start a new Lesson!', 'Login', and 'Signup'. Below the header, the main content area is titled 'Create a New Music Lesson'. This section contains a series of input fields for creating a lesson: 'Enter your instrument:', 'Enter the song you would like to teach:', 'Enter your Genre:', 'Enter your song's artist:', 'Enter lesson start date:', 'Enter lesson end date:', and 'Enter your average class duration:'. Each label is followed by a white input box. At the bottom of this form is a green button labeled 'Create New Lesson'. The footer of the page is a black bar with the text 'Copyright MusicTogether' and two links, 'ABOUT' and 'CONTACT', in a lighter font.

Further work:

- 1) I would like to refine the header menus. They have a dark font (to indicate clickable links), which makes it hard to notice them with the black background.
- 2) I would like to center the New Connection input item list. In a phone app setting, it is well aligned. However, in a web app, the items gets skewed to the side.
